*Allowable Subject Matter*

1. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, prior art has not been found that suggests or renders obvious wherein a call time interval of retrying said radio communication between said arbitrary portable radio communication terminals and said radio communication base station is set longer than an average communication time of said radio-communication between each of said portable radio communication terminals and said radio communication base station in said commodity management system, in combination with each and every other limitation in the claim(s) as defined by applicant.

Regarding claims 2, 7, 8, these claims are corresponding claims to claim 1; therefore, they are allowed for the same reason, in combination with each and every other limitation in the claim(s) as defined by applicant.

Regarding claim 3, prior art has not been found that suggests or renders obvious wherein said test for said radio communication section is executed after checking that said radio communication between each of said portable radio communication terminals and said radio communication base station is vacant continuously in a case out of an execution prohibiting time zone in said commodity management system, in combination with each and every other limitation in the claim(s) as defined by applicant.
